DETAILED ACTION

1. This action is responsive to communication: Amendment A, filed on 07/28/2004.
This action is made final.

Allowable Subject Matter

2. Claims 4-6, 15-17, and 25-29 are allowed.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-3, 12-14 and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by Lister et al., US# 2002/0178297 A1.

As per claim 1, Lister et al. teaches "receiving data from a server application"
(see page 6, paragraphs [0049]-[0051]) "determining whether the data is serializable"
(see page 4, paragraphs [0030] and [0032]) "storing the data in a data structure and forwarding, to a client, a reference to the data structure if the data is not serializable"
(see page 4, paragraphs [0030] and [0036]).

Art Unit: 2163

As per claims 2-3, Lister et al. teaches "a hash table . . . key . . ." (see page 4, paragraph [0036])).

As per claims 12-14, these claims are rejected on grounds corresponding to the arguments given above for rejected claims 1-3 and are similarly rejected.

Response to Arguments

5. Applicant's arguments filed 07/28/04 have been fully considered but they are not persuasive.

As per applicant's arguments regarding "does not teach or suggest determining whether data is serializable and storing the data in a data structure if the data is not serialiazable", examiner maintains that Lister's teachings of objects and task descriptions clearly indicates that a determining element is present when identifying object, target liaisons, tasks description, etc., in a fashion as illustrated in applicant's claim language. Further, Lister's data structure stores both the serializable as well as other objects and therefore reads on applicant's claim language involving the storing of data in a data structure.

As per applicant's arguments regarding "Lister does not teach or suggest storing data in a data structure that comprises a hash table . . .", examiner maintains that Lister's "hash table", operates in a manner synonymous to applicant's hash table and therefore the teachings are substantially similar.

Conclusion

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
